## **Election/Restriction**

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claim 91, 93- 99, 101-106, 121-125, 153-163 drawn to a method and a system for modifying an image having pixels with out manual intervention, classified class 382, subclass 165.

II. Claims 164-172 drawn to user interface for image modification using manual intervention or user interface, classified in class 715, subclass 700.

2. Inventions I and II are distinct from each other because of the following reason:

Invention I and II are related as subcombination disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Invention II has separate utility such as externally or manually controlling the computer to modify the image and invention II has separate utility such internally processing the image to modify the image.

3. Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their classification, restriction for examination purpose as indicated is proper.
